Executive Summary

PIONEER Technologies Corporation (PIONEER) conducted a Phase I Environmental Site Assessment (ESA) on behalf of the Port of Tacoma (Port) for the South Intermodal Yard (SIM Yard) which is located at 1738 Milwaukee Way in Tacoma, Washington. The purpose of this ESA is to identify and evaluate recognized environmental conditions (RECs) at the Site.

Summary of the ESA

This ESA was conducted in accordance with the Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (American Society for Testing and Materials International Designation: E1527-13) and includes a Site description, user-provided information, records review, interviews, Site reconnaissance, and findings and opinions.

Recognized Environmental Conditions

PIONEER has identified the following RECs in connection with the property:

- **RECs**
  - Potential soil and groundwater contamination from the former City of Tacoma Lincoln Landfill.
  - Potential groundwater contamination from multiple off-Site sources hydrologically upgradient of the Site.
  - Potential soil contamination related to releases from an underground storage tank (UST).
- **CRECs[1] and HRECs[2]**
  - Confirmed (and controlled) soil, groundwater, and surface water contamination from lumber treatment, storage, and handling at the McFarland Cascade Pole & Lumber Co property.
  - Confirmed (and controlled) soil and groundwater contamination from historical petroleum storage and handling at the Fred Tebbs & Sons property.

[1] A CREC is defined as "a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."

[2] A HREC is defined as "a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."

This page has been left blank intentionally to allow for double-sided printing.

SECTION 1: INTRODUCTION

PIONEER Technologies Corporation (PIONEER) was retained by the Port of Tacoma (Port) to conduct a Phase I Environmental Site Assessment (ESA) for the South Intermodal Yard (SIM Yard), which is composed of six tax parcels, and is located in Tacoma, Washington (see Figure 1).

Pierce County Tax Number	2275200650, 0321344025, 0320031011, 5260000030, 5260000040, 0320031020
Section	34
Township	21N/20N
Zoning	4009 (Other Trans Utilities)
Latitude	47.260514
Longitude	-122.409182

This Phase I ESA was conducted following the guidelines listed in the American Society of Testing and Material (ASTM) Designation: E1527-13.

1.1 Purpose

The purpose of this Phase I ESA is to determine if any type of recognized environmental condition (REC) exists, or has existed, within a subject property/Site. The ASTM Designation E1527-13 defines a REC as:

"…the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions."

1.2 Scope of Services

This Phase I ESA was conducted in accordance with ASTM Designation: E1527-13, and includes the following:

- A site description;
- A review of user-provided materials, including previous ESAs (if available);
- A review of records (federal and state environmental database searches, and historical use records);
- A site visit;
- Interviews; and
- An evaluation of the information provided herein and preparation of this report.

Non-scope considerations (i.e., asbestos-containing materials, lead-based paint, radon, wetlands) were not considered during this Phase I ESA.

1.3 Significant Assumptions

Information regarding the subject property/Site was reasonably ascertainable; therefore, no significant assumptions were made, unless otherwise noted in a specific section of this report.

1.4 Limitations and Expectations

Along with all of the limitations set forth in various sections of the ASTM Designation: E1527-13 protocol, the accuracy and completeness of this Phase I ESA may be limited by the following:

Access Limitations:	None
Physical Obstructions to Observations:	None
Historical Data Source Failure:	None

1.5 Special Terms and Conditions

No special terms and conditions were agreed upon between PIONEER and the Port.

1.6 Deviations

There were no deviations from the recommended scope of ASTM Designation: E 1527-13 during this Phase I ESA.

1.7 User Reliance

"User" is defined in ASTM Designation: E1527-13 as "the party seeking to use Practice E 1527 to complete an environmental site assessment of the property. A user may include, without limitation, a potential purchaser of the property, a potential tenant of property, an owner of property, a lender, or a property manager."

For this report, "user" refers to the Port and does not include subsequent potential property purchasers, their lenders, or prospective tenants who did not participate in the commissioning of this report and who are not involved in the present transaction concerning the subject property/Site that prompted the ESA.

This report is intended for use by the "user" only, and only for the previously stated purposes. The observations, findings, opinions, and recommendations in this report can only be considered valid as of the day of the Site visit. The "user" may only rely on the results of this Phase I ESA for 180 days from the date of its issuance (ASTM Designation: E1527-13, Section 4.6).

Any party other than the "user" who would like to use this report shall notify PIONEER. Such parties will rely on the results of the report at their own risk. No third party shall be permitted to rely on this report without the express written consent of PIONEER. Noncompliance with any of these requirements will release PIONEER from liability resulting from the use of this report by an unauthorized party, and the "user" agrees to hold PIONEER harmless from any claim or liability associated with such unauthorized use or noncompliance.

SECTION 2: SUBJECT PROPERTY/SITE DESCRIPTION

2.1 Site Location and Legal Description

The subject property/Site is located in Tacoma, Washington and is comprised of multiple parcels. The Site is approximately 19 acres and currently owned by the City of Tacoma (City). The Port rents the property from the City and Pacific Rail Services conducts all operations at the Site.

2.2 Vicinity General Characteristics

The subject property/Site is located in a highly industrial area within a large container seaport facility at the Port.

2.3 Current Use of subject property/Site

The Site is zoned as "Other Trans Utilities", and the SIM Yard is used as a rail yard. Goods that are delivered to the SIM Yard are transported across Milwaukee Way to the SIM Yard Storage Area on the west side of Milwaukee Way.

2.4 Current Use of Adjoining Properties

The properties surrounding the subject property/Site are industrial in nature. Property usage around and adjoining the Site includes:

Direction from subject property/Site	Description
North	E 11th Street and Sitcum Way are located immediately north of the Site, and the Port Administration Building is located north of Sitcum Way.
South	Lincoln Avenue is located immediately south of the Site, and a freight yard is located south of Lincoln Avenue.
East	Various industrial businesses are located east of the Site including Northwest Forest, Pacific Lift Equipment, Georgia Pacific Resins Inc, Shaub Ellison Co Tacoma, Bennett Industries, Global Metal Works and Erectors, Greenbriar Rail Services, Penske Truck Rental, Pabco Roofing, and Tacoma Metals.
West	Milwaukee Way is located immediately west of the Site, and a freight yard (other portion of the SIM Yard) is located west of Milwaukee Way.

This page has been left blank intentionally to allow for double-sided printing.

SECTION 3: USER-PROVIDED INFORMATION

The Port is considered the user for this Phase I ESA. The ASTM E1527-13 user questionnaire was completed by (1) Scott Hooton, Project Manager of Environmental Programs (2) Stanley Sasser, Environmental Analyst at the Port, and (3) Michael Reilly of the Northwest Seaport Alliance and is included with this report in Appendix A.

3.1 Title Records

The user did not provide title records.

3.2 Environmental Liens or Activity and Use Limitations

The user was not aware of any environmental liens or activity and use limitations.

3.3 Specialized Knowledge

The user stated that the Site is located near a number of known contaminated properties, including a former rail yard and locomotive repair facility across Milwaukee Way, and the City dump. There are also reports of releases associated with the rail line. The user is aware of a railcar dripping diesel or heavy oil within the last six months. There are absorbent pads in an area of the rail yard that absorb oil.

3.4 Commonly Known or Reasonably Ascertainable Information

In the previous Phase I ESA, the user stated that a past use of the property was Tideflats associated with the Puyallup River and Commencement Bay (PIONEER 2016). More recently, the user learned that an underground storage tank, UST, had been located on the property.

3.5 Valuation Reduction for Environmental Issues

The user stated that a purchase price for the property is yet to be determined. Two appraisers produced appraisals which are currently being reviewed. A final purchase price will reflect the fair market value of the property.

3.6 Owner, Property Manager, and Occupant Information

The subject property/Site is owned by the City. Currently, there is no property manager. It has been leased by the Port since 1984. The property serves as an intermodal rail yard operated by Pacific Rail Services on behalf of the Port.

3.7 Reason for Performing a Phase I ESA

The user is planning to purchase the Site from Tacoma Public Utilities. An ESA is needed to inform the Purchase and Sales Agreement and the Port Commission.

This page has been left blank intentionally to allow for double-sided printing.

SECTION 4: RECORDS REVIEW

Environmental Data Resources, Inc. (EDR) conducted a search of state and federal databases containing physical setting information, known and suspected sites of environmental contamination, and historical use information. The reports provided by EDR are included in Appendix B.

4.1 Physical Setting Sources

EDR's Physical Setting Source GeoCheck was used to provide an opinion about the impact of potential contaminant migration.

4.1.1 Topography

The general topographical gradient is general northeast. The Site's general elevation is 11 feet above sea level, and the Site is generally flat.

4.1.2 Groundwater Flow and Velocity

The groundwater flow direction data is not available. Surficial aquifer flow direction data is available for the adjoining Former Milwaukee Rail yard. Based on the available data, groundwater flow in the vicinity generally flows north (PIONEER 2012).

4.1.3 Geology

The Site is located within the Port of Tacoma. The Port was developed over an estuarine delta, formed by the entrance of the Puyallup River into Commencement Bay. Subsurface stratigraphy in the Port typically consist of 10 to 20 feet of dredge fill placed during the early 20th century. The fill material is generally sand with fines. Below the fill are channelized tideflat deposits consisting of sands, silts, and clays. Tideflats deposits overlay subaqueous delta front deposits.

4.2 Standard Environmental Record Sources

Reasonably ascertainable and publicly available standard environmental record sources were reviewed to identify RECs in connection with the Site. In order to fully assess the likelihood of an impact to the property from migrating hazardous substances or petroleum products, an approximate minimum search distance (AMSD) was used for each database. The AMSD and the number of listings/properties within each AMSD for each federal and state database is presented in Table 1. Listings/properties across the Puyallup River and the Blair Waterway were not evaluated due to the topography, surface waterbodies, and distance from the Site.

4.2.1 Federal and State Database Records Search

The number of listings/properties within the AMSD for each database is presented in Table 1. Each listing/property is presented in Table 2, and details for selected listings/properties such as Model Toxics Control Act (MTCA) sites located adjacent to the SIM yard and additional findings are presented in Table

3. The location of each listing/property presented in Table 2 is displayed on Figure 4. MTCA sites located adjacent to the SIM yard are displayed on Figure 5.

4.2.2 Federal Databases

4.2.2.1 Federal National Priorities List (NPL) Site List

One listing/property was listed in the NPL and within the AMSD of 1 mile.

4.2.2.2 Federal Delisted NPL Site List

No listings/properties were listed in the Delisted NPL and within the AMSD of 1 mile.

4.2.2.3 Federal Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) List

The Federal Facility and Superfund Enterprise Management System (SEMS) databases were reviewed. Seven listings/properties were listed within these databases and within the AMSD of 0.5 miles.

4.2.2.4 Federal CERCLIS No Further Remedial Action Planned (NFRAP) List

Three listings/properties were listed in the SEMS-Archive database and within the AMSD of 0.5 miles.

4.2.2.5 Federal Resource Conservation and Recovery Act (RCRA) Corrective Action Sites (CORRACTS) Facilities List

Seven listings/properties were listed in the CORRACTS database and within the AMSD of 1 mile.

4.2.2.6 Federal RCRA non-CORRACTS Treatment, Storage and Disposal (TSD) Facility List

One listing/property was listed in the RCRA-TSD database.

4.2.2.7 Federal RCRA Generators List

Seven adjoining properties were listed within the RCRA generators lists (limited quantity generators [LQG], small quantity generators [SQG], and small quantity generators [CESQG]) and within the AMSD of the Site and adjoining properties.

4.2.2.8 Federal Institutional Control/Engineering Controls Registry

The Land Use Control Information System (LUCIS), US ENG CONTROLS (Engineering Controls), and US INST CONTROLS (Institutional Controls) databases were reviewed. The Site (the Site was the AMSD) was not listed in the LUCIS database. However, four listings/properties were listed in US ENG CONTROLS and US INST CONTROLS.

4.2.2.9 Federal Emergency Response Notification System (ERNS) List

The Site (the Site was the AMSD) was not listed in the Emergency Response Notification System (ERNS).

4.2.3 State Databases

4.2.3.1 State and Tribal Equivalent NPL

Twenty-five listings/properties were listed in the Washington Hazardous Sites List (HSL) and within the AMSD of 1 mile.

4.2.3.2 State and Tribal Equivalent CERCLIS

Sixty-seven listings/properties were listed in the Washington Confirmed and Suspected Contaminated Sites List (CSCSL) and within the AMSD of 1 mile.

4.2.3.3 State and Tribal Landfill and/or Solid Waste Disposal Site Lists

Seven listings/properties were listed in the Washington Solid Waste Facility/Landfill (SWF/LF) database and within the AMSD of 0.5 miles.

4.2.3.4 State and Tribal Leaking Storage Tank Lists

Eighteen listings/properties were listed in the Washington Leaking Underground Storage Tank (LUST) database and the Indian LUST database and within the AMSD of 0.5 miles.

4.2.3.5 State and Tribal Registered Storage Tank Lists

The Federal Emergency Management Agency (FEMA) UST, aboveground storage tank (AST), and Indian UST databases were reviewed. Twenty-one listings/properties were listed in these databases within the AMSD of the Site and adjoining properties.

4.2.3.6 State and Tribal Institutional Control/Engineering Control Registries

The Site (the Site was the AMSD) has seven listings in the Washington Institutional Control database.

4.2.3.7 State and Tribal Voluntary Cleanup Sites

The Washington Information Collection Rule (ICR), Washington Voluntary Cleanup Program (VCP), and Indian VCP were reviewed. Twenty-eight listings/properties were listed in these databases and within the AMSD of 0.5 miles.

4.2.3.8 State and Tribal Brownfield Sites

No listings/properties were listed in the Brownfields database and within the AMSD of 0.5 miles.

4.2.4 Additional Environmental Record Sources

To supplement the standard environmental records review, local records and additional federal, state, or tribal records were reviewed. The number of listings/properties within the AMSD for each database is presented in Table 1, and the details for each listing/property in the EDR records search that were considered relevant to the site are presented in Table 3.

4.2.4.1 Local Brownfield Lists

No listings/properties were listed in the US Brownfields list and within the AMSD of 0.5 miles.

4.2.4.2 Local Lists of Landfill/Solid Waste Disposal Sites

The Solid Waste Tire Facilities (SWTIRE), Washington Solid Waste Recycling (WA SWRCY), Open Dumps on Indian Lands (Indian ODI), Debris Region 9, and IHS (Indian Health Service) Open Dumps databases were reviewed. Four listings/properties were listed in these databases and within the AMSD of 0.5 miles.

4.2.4.3 Local Lists of Hazardous Waste/Contaminated Sites

The United States (US) Historical Delisted National Clandestine Laboratory Ranger (CDL), ALLSITES, CDL, Historical CDL, CSCSL No Further Action (NFA), US CDL, and Washington PFAS databases were reviewed. One-hundred and seventy-two listings/properties were listed in these databases and within the AMSD of 0.5 miles.

4.2.4.4 Other Record Sources

The CERCLA Lien Information (LIENS 2), Hazardous Materials Information Reporting System (HMIRS), Reported Spills (SPILLS), SPILLS 90, RCRA NonGen/No Longer Regulated (NLR), Hazardous Waste Manifest Information (MANIFEST), EDR MGP (Property Manufactured Gas Plants), Historical Auto Repair Shops, Historical Cleaners, WA RGA (Recovered Government Archive) HWS (Hazardous Waste Facilities) LF (Solid Waste Facilities List), and LUST (Leaking Underground Storage Tank) databases were reviewed. Eighty-One listings/properties were listed in these databases.

4.3 Historic Use Information

Historical use information was obtained from historical aerial photos, Sanborn Fire Insurance Maps, and city directories. This information is presented in Appendix B.

4.3.1 Aerial Photos

Year	Site	Adjoining Properties
1941	Undeveloped	Development to the west of Milwaukee Way
1943	Undeveloped	Development to the west of Milwaukee Way and north of E 11th Street
1957	Railyard	Significant development in the surrounding area. Log yard to the north of E 11th Street.
1968	Railyard	Increased industrial development east of the Site
1972	Railyard	Entire vicinity appears to be developed (industrial)
1975	Photo compromised / unable to interpret	
1980	Railyard	Entire vicinity appears to be developed (industrial)
1990	Railyard	Entire vicinity appears to be developed (industrial). Structures on the property west of Milwaukee Way demolished.
2006	Railyard	Entire vicinity appears to be developed (industrial)
2009	Railyard	Entire vicinity appears to be developed (industrial)
2017	Railyard	Entire vicinity appears to be developed (industrial)

4.3.2 Historical Topographical Maps

Year	Site	Adjoining Properties
1897	Undeveloped land	Undeveloped land
1900	Undeveloped land	Undeveloped land
1949	Railyard	Development mostly along the waterfront and west of Milwaukee Way.

1961	Railyard	Development mostly along the waterfront and west of Milwaukee Way. A few more developments east of the Site.
1968	Railyard	Development mostly along the waterfront and west of Milwaukee Way. A few more developments east/southeast of the Site.
1973	Railyard	Similar to 1968 map
1981	Railyard	Similar to 1968 map. More dredging in Blair Waterway.
1994	Railyard	Similar to 1981 map
1997	Railyard	Similar to 1994 map
2014	No features other than roads are displayed. Roadways appear similar to current-day.	

4.3.3 City Directory Search

Year	Site	Street Address
1958	Belt Line Railway Division Yard	1801 Milwaukee Way
1963	City Public Utilities Department Belt Line Railway Division Yard	1801 Milwaukee Way
1965	City Public Utilities Department Railway Division	1801 Milwaukee Way
1983, 1978,1974,1970	City Pub Utilities Department Railway Division	1801 Milwaukee Way
1983,1978	Milwaukee Motor Transportation Yard	1800 Milwaukee Way
1993	Port of Tacoma Trailer Parking	1800 Milwaukee Way
2004	America Railroads Freight & Cargo Pacific Rail SVC Containerized	1738 Milwaukee Way
2010	America Railroads	1738 Milwaukee Way
2014	LSA INC Pacific Rail Services LLC	1738 Milwaukee Way

4.3.4 Sanborn Fire Insurance Maps

Year	Site	Adjoining Properties
1912	Not featured/no buildings	The area to the east of the Site is occupied by the Chicago, Milwaukee, Saint Paul, and Pacific Railroad Company (CMSPRC). The following are located on the CMSPRC property: A wood working shop; A small boiler and tank shop; A machine shop; A printing shop; A roundhouse for locomotive repair; An auto shop (directly adjacent to Sitcum Avenue); Storage buildings (used for iron, castings, and machines); and Railroad tracks running the entire length of Sitcum Avenue.
1950	Not featured/no buildings	The Sanborn maps are similar to the 1912 map with a few more buildings on the CMSPRC property, including a new print shop and a new steel fuel oil tank.
1965	Not featured/no buildings	No change to the west. The area to the east of the site is labeled as the Tacoma Belt Line Interchange Yard. Various structures can be found in the Interchange Yard, including: Wood truss and manufacturing shop; Chemical (liquid aluminum) manufacturing building (IED Chemical Corporation); Lumber yard (Woodlam, Inc.); Manufacturing building products building, which has roofing material stages (Certain-Teed Products Corp.); Resin process plant (Balfour Guthrie Company, Ltd.);

Year	Site	Adjoining Properties
		Fertilizer manufacturing building; and Bleach manufacturing (Purex Corporation, Ltd.).

4.4 Additional Environmental Record Sources

4.4.1 Washington Department of Ecology's Periodic Review of Union Pacific Railroad's Former Milwaukee Railyard

The former CMSPRC (South Intermodal Yard) railyard (see Figure 5; map ID #7), which is currently used for car storage and as a portion of the Port's South Intermodal Railyard (the portion west of Milwaukee Way that is not the Site), was the CMSPRC's main headquarters for train maintenance until 1980. The rail yard contained maintenance and repair shops, a blacksmith shop, a machine shop, a powerhouse, fuel storage (i.e., USTs and ASTs), an underground pipeline used to transport diesel and Bunker C fuel oil, a woodworking shop, and various other buildings. Previous Phase I and Phase II ESAs were commissioned by the previous owner (Union Pacific Railroad), and a hydrogeologic characterization were performed. The characterization identified soil and groundwater contamination from petroleum hydrocarbon storage and handling activities associated with the CMSPRC railyard are listed below:

- Concentrations up to 66,000 milligrams per kilogram of total petroleum hydrocarbons in the diesel range were measured in soil; and
- Wood-preserving chemicals from off-property sources (e.g., arsenic, pentachlorophenol, and chromium) were measured in rail yard soil and groundwater (Ecology 2011).

The Port entered into a Proposed Purchaser Consent Decree (PPCD) with CMSPRC in 1994 and purchased the property in 1995. The PPCD included a cleanup action plan that used Model Toxics Control Act (MTCA) Method A industrial cleanup levels for soil and MTCA Method B cleanup levels for groundwater.

A two-phase remediation system was implemented to treat groundwater and flush contaminated soil, and included vacuum-enhanced pumping from multiple wells.

1. In phase one, vacuum-enhanced pumping was performed and recovered free product, and treated groundwater was re-injected upgradient or at the edge of the plume.
2. In phase two, vacuum-enhanced pumping was performed at the northwest edge or the main area of the plume, and treated groundwater was injected into the plume to flush contaminated soils.

Most of the property was paved with asphalt between 2004 and 2005 to provide a working surface above the protective fill layer placed to isolate remnant soil contamination. Activities that will result in a release of contaminants from the property are prohibited.

The two-phase remediation system was shut down in 2007 after groundwater monitoring showed that petroleum concentrations were below PPCD cleanup criteria for protection of adjacent surface water quality. Groundwater monitoring continues at the property and the periodic review determined that (1) soil cleanup levels have not been met and (2) groundwater cleanup levels have been met.

4.4.2 *Tacoma-Pierce County Health Department (TPCHD) Closed Landfill Study – Pierce County, Washington*

The TPCHD study presents an inventory of closed dump sites and landfills in Pierce County, and identifies public health risks associated with these dump sites and landfills. This Phase I ESA focused on the City's Lincoln Avenue Landfill (also known as Tacoma Tideflats), which encompassed most of the area southwest of the Site and intersected the southern portion of the Site (see Figure 5; map ID #20).

The landfill was used from the 1940s to 1964. It was primarily located along the Puyallup River and expanded as the area was filled. Originally, the materials that were deposited at the landfill were burned. However, as the landfill expanded, the dumped material was instead used as fill to build up the area for industry.

Methane was considered a suspected problem, particularly methane accumulation in confined spaces. The TPCHD performs quarterly methane monitoring near the Puyallup River (TPCHD 2010).

4.4.3 *Underground Storage Tank Removal Monitoring – South Intermodal Rail Yard, Tacoma, Washington*

The Port of Tacoma's SIM Yard UST was registered and in use with the WA State Department of Ecology in August 1991. In January of 1993, a notice of intent to close the tank was filed with Ecology. A permit application was submitted to remove the tank, and the tank was removed/abandoned in February of 1993 (see Figure 5; map ID #18) (GeoEngineers 1993).

The 10,000-gallon fiberglass UST was removed, and 350 gallons of product was removed from the tank. A site assessment report was submitted in April of 1993, and diesel was detected in three soil samples that exceeded MTCA Method A Cleanup Standards: between 2200 and 4600 mg/kg. Groundwater was encountered at a depth of nine feet in the excavation and samples were not obtained for laboratory analysis. No holes, cracks or pits were detected on the exterior of the tank. Soil contamination found at depths near the water table could be related to releases from the tank (GeoEngineers 1993). However, it appeared that the diesel-range petroleum hydrocarbons that were detected in a shallow soil sample (at a depth of 2.5 feet from a pocket of pea gravel in the northeast corner of the tank excavation) was not related to the tank contamination. Soil contamination could also be a result of historical activities at the Site not related to the tank. The Tacoma Tideflats parcels had been in use for industrial activity since the turn of the century (GeoEngineers 1993).

This page has been left blank intentionally to allow for double-sided printing.

SECTION 5: SITE RECONNAISSANCE

Site reconnaissance was conducted on October 11, 2019 by Stephanie Herrera of PIONEER. She was accompanied by Scott Hooton and Stanley Sasser of the Port. The Site reconnaissance consisted of a visual inspection.

5.1 Limiting Conditions

There were no limiting conditions.

5.2 On-Site Observations

5.2.1 Drains and Sumps

There is one drain connected to the sewer. No sumps were observed.

5.2.2 Drums

No drums were observed.

5.2.3 Hazardous Substances and Petroleum Product Containers

No hazardous substances and/or petroleum product containers were observed.

5.2.4 Heating/Cooling

No heating/cooling units were observed.

5.2.5 Leaks, Stains, and Corrosion

Stains were observed along the rail line. Corrosion was present on the rail lines as well. The stains and corrosion appeared to be typical of a rail line.

5.2.6 Odors

Typical exhaust odors were observed. Typical odors from a nearby papermill was also detected.

5.2.7 Pits, Ponds, or Lagoons

No pits, ponds, or lagoons were observed.

5.2.8 Pools of Liquid

No pools of liquid were observed.

5.2.9 Roads

The majority of the Site is paved and/or rail lines intended for transporting goods.

5.2.10 Sewage Disposal System

No sewer utilities were observed.

5.2.11 Solid Waste Disposal

No solid waste disposal observed.

5.2.12 Stained Soil or Pavement

Typical stains were observed around the rail lines.

5.2.13 Storage Tanks

Above ground storage tank with exhaust fuel (potentially urea) was observed.

5.2.14 Stressed Vegetation

No stressed vegetation was observed.

5.2.15 Structures and Improvements

There is a trailer used by the current operator (Pacific Rail Services), a maintenance shop, a metal recycler, a refinery, a paper mill, and a landfill nearby.

5.2.16 Unidentified Substance Containers

No unidentified substance containers were observed.

5.2.17 Waste Water

No waste water was observed.

5.2.18 Water Supply

No water utilities were observed.

5.2.19 Wells

No wells were observed.

5.2.20 Other Observations

A larger number of nuts, bolts, and other metal parts were observed along the rail line. Uncovered scrap metal was also observed in one area of the Site.

Typical petroleum spills from small leaks or drips were observed throughout the rail yard, which is an on-going issue due to the activity of multiple users on the track. There are several potentially responsible parties. Absorbent pads were observed in the rail yard which absorb oil and oil-based liquids. Fuel tanks, spill kits, and an oil/water separator were also observed.

5.3 Adjoining and Nearby Properties

The adjoining and nearby properties were all industrial in nature.

SECTION 6: INTERVIEWS

6.1 Interview with Pacific Rail

One Pacific Rail employee was interviewed. He noted that there are no maintenance facilities on the Site, only a control tower. He stated that there were drums with locomotive oil in the back of the maintenance shop that were not observed. He had no knowledge of hazardous contamination or spills.

In the previous Phase I ESA, on-site interviews were conducted with two Pacific Rail employees (PIONEER 2016). One of the employees was C. Wheeler, who had been working at the Site for at least twenty years. He had no knowledge of hazardous contamination or spills. He mentioned there are a few oil leaks every once in a while, but protocols are in place to handle the small issues (e.g., absorbent sheets). He also mentioned a stormwater treatment system, which the other Pacific Rail employee, Curt Stoner, clarified was a Level 3 corrective action for stormwater; the system is a self-treatment system, and levels are monitored and meet National Pollution Discharge Elimination System (NPDES) requirements. Consistent attainment with NPDES requirements occurred after the system was installed. Port personnel noted that there is a blockage in one of the legs of the stormwater system draining water from the railroad spur off-property.

The second employee was a maintenance employee, named Todd. He stated that the maintenance facility has never had an incident (PIONEER 2016).

6.2 Interview with Local Government Officials

In the previous Phase I ESA, South Sound 911 Public Records Center was contacted to obtain public fire and health records, but they stated that there are no response records for the Site (PIONEER 2016). Therefore, no one was interviewed from this organization.

This page has been left blank intentionally to allow for double-sided printing.

SECTION 7: FINDINGS AND OPINIONS

7.1 Findings

7.1.1 Records Review

A review of reasonably ascertainable records (federal, state, and local environmental databases) was conducted.

There were 176 listings/properties that were within the required AMSD of the environmental databases presented in Table 3. The listing/properties with notable points are presented in detail in Table 3 and listed below:

- Seven of the listings/properties contain contaminants (i.e., halogenated organics, petroleum, PAHs, and/or metals) in groundwater and are awaiting cleanup or cleanup has started and are hydrologically upgradient of the Site (Table 3 and Figure 5 Map IDs 3, 6, 10, 11, 20, 21, and 25);
- One site was a historic landfill with a boundary that extended into the Site (Table 3 and Figure 5 Map ID 20);
- Three of the properties have been cleaned up and have an ongoing monitoring program (Table 3 and Figure 5 Map IDs 7, 8, and 9); and
- Forty-four listings/properties are MTCA sites located adjacent to the SIM yard, RECs, or due diligence findings from the last few years (Table 3 and Figure 5 Map IDs 1-44).

The remaining properties would not impact the Site because:

- They were listed because of a stormwater permit;
- They were listed due to a small spill that is unlikely to affect the Site because of magnitude, distance, or media;
- They were NFA and unlikely to affect the Site with or without institutional/engineering controls;
- There were listed because they are hazardous waste generators;
- They have an awaiting cleanup or cleanup started status for contamination that is unlikely to affect the Site due to distance and/or media;
- They were listed because a UST was removed; and/or
- They were listed because of a routine inspection.

7.1.2 Site Reconnaissance Findings

During the Site reconnaissance, the Site appeared to be a maintained industrial site. There were no unmarked containers or pits at the Site. Additionally, there was a large amount of scrap metal around the rail lines and in a storage area near the entrance of the SIM Yard. There were also some stains observed around the rail lines; however, they were typical and did not appear to be the result of any large-scale spills.

7.1.3 Interview Findings

The interviewees that were contacted reported no knowledge of any environmental impacts to the Site, or any records of issues or emergency responses at the Site.

7.2 Opinions

The following is a summary that presents the opinions of the Phase I ESA findings and the RECs for the Site. The identified RECs are presented in Table 3 and on Figure 5.

- Releases to groundwater from properties located hydrologically upgradient of the Site have potentially resulted in the movement of contaminants via groundwater to the Site, and contaminated groundwater is considered a suspected REC (Table 3 and Figure 5 Map IDs 3, 6, 10, 11, 20, 21, and 25);
- Fill and burning of material at the former City Lincoln Avenue Landfill potentially resulted in soil and groundwater contamination at the Site, and the contamination is considered a suspected REC (Table 3 and Figure 5 Map ID 20);
- Rail yard activities (from the former CMSPRC) have resulted in known releases of petroleum products to soil and groundwater at concentrations above MTCA cleanup levels. The property has (1) a cleanup action plan that monitors groundwater levels, (2) an asphalt cap, (3) site access control, and (4) a restrictive covenant that restricts further groundwater contamination; therefore, it is considered a controlled REC (CREC)[3] (Table 3 and Figure 5 Map ID 7);
- Fred Tebbs & Sons activities have resulted in known releases of petroleum products to soil. The property has completed an interim cleanup and years of groundwater monitoring have been conducted. Therefore, it is considered a historical REC (HREC)[4] (Table 3 and Figure 5 Map ID 8);
- McFarland Cascade Pole & Lumber Company activities have resulted in known releases of base/neutral/acid organics, metals, non-halogenated solvents, phenolic compounds, and PAHs to groundwater, surface water, and/or soil. The property has active monitoring and is considered a CREC (Table 3 and Figure 5 Map ID 9);
- Diesel-range hydrocarbons detected in the soil at depths of 7 feet immediately surrounding the underground storage tank are potentially a result of leaks or spills associated with the UST (Figure 5 and Figure 5 Map ID 27).

There were a few conditions observed at the Site that qualify as De Minimis conditions[5], including:

- In the previous Phase I ESA, there were three 55-gallon polyethylene drums of diesel exhaust fluid without secondary containment near the maintenance shop. Per the material safety data sheet (Appendix D), it is recommended that diesel exhaust fluid be protected and stored in a cool, dry area. Secondary containment is recommended for drums that are currently on-Site or that will be stored on-Site in the future (PIONEER 2016);

[3] A CREC is defined as a REC "resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."

[4] A HREC is defined as "a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."

[5] A De Minimis condition is defined as a "condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis conditions are not RECs or CRECs."

- An above ground storage tank with exhaust fuel was observed near the maintenance shop (potentially urea);
- Scrap metal is present along the rail line and in a storage area on a small portion of the Site. Solid waste must be managed according to state and federal laws;
- Oil stains were observed along the rail lines. Best management practices should be considered to eliminate small amounts of oil leaking from rail cars, vehicles, etc. Over time, oil stains can be washed into water ways.

SECTION 8: CONCLUSIONS

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM Designation E 1527-13 for the SIM Yard, Pierce County Parcel Numbers 2275200650, 0321344025, 0320031011, 5260000030, 5260000040, 0320031020. Any exceptions to, or deletions from, this practice are described in this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the property except for the following:

- **RECs**
  - Potential soil and groundwater contamination from the former City Lincoln Landfill.
  - Potential groundwater contamination from multiple off-Site sources hydrologically upgradient of the Site.
  - Potential soil contamination related to releases from a UST.
- **CRECs and HRECs**
  - Confirmed (and controlled) soil, groundwater, and surface water contamination from lumber treatment, storage and handling at the McFarland Cascade Pole & Lumber Co property.
  - Confirmed (and controlled) soil and groundwater contamination from historical petroleum storage and handling at the Fred Tebbs & Sons property.

I, the signatory of this report, declare that, to the best of my professional knowledge and belief, I meet the definition of an Environmental Professional, as defined in Section 312.10 of 40 CFR Part 312, and that I have the specific qualifications based on education, training, and expertise to assess a property of the nature, history, and setting of the site. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR, Part 312.

ID	Figure 4 Map ID	Figure 5 Map ID	Facility	Address	Distance from Site(miles)	Databases	Notes
65	65	1	Tacoma Port Terminal 7	1 Sitcum Plaza	0.034	ALLSITES, CSCSL NFA	NFA since 1996
104	104	2	Pacific Auto Wrecking	1652 Lincoln Avenue	0.195	ALLSITES, UST	UST removed in 1996
AA116	AA	3	Tacoma Transnational Leasing	1662 Lincoln Avenue	0.206	ICR, LUST, ALLSITES, CSCSL, RCRA NonGen/NLR, FINDS, ECHO, UST	Interim cleanup report in 1990. Benzene, petroleum, and other non-halogenated organics confirmed above cleanup level in groundwater. Petroleum confirmed above cleanup levels in soil. Cleanup started.
AA115	AA	4	Concrete & Steel Systems Inc.	1674 1/2 Lincoln Avenue	0.204	ALLSITES, RCRA NonGen/NLR, FINDS, ECHO	Historical waste generator
X89	X	5	PALLET SERVICES	1651 Lincoln Avenue E	0.208	SWRCY, SWF/LF, ALLSITES, SPILLS, NPDES	Industrial SW GP; 100 gallon diesel spill to soil in 2010
162	162	6	Puget Sound Truck Lines Inc Tacoma	2114 E Marshall Avenue	0.245	HSL, CSCSL, LUST, ALLSITES, UST, SPILLS	Petoleum confirmed above cleanup levels in groundwater and soil. Cleanup started. 75 gallon diesel spill to soil in 2012.
A1	A	7	South Intermodal Yard (former CMSPRC rail yard)	1738 Milwaukee Way	0.000	CSCSL, LUST, ALLSITES, UST, NPDES	Petroleum above cleanup levels in groundwater and soil. Cleanup started for LUST in 1993.
AA128	AA128	8	Fred Tebbs & Sons	1906 Marc Street	0.219	ICR	Groundwater monitoring occuring for petroleum products in soil and groundwater. NFA since 2003.
AC125	AC	9	McFarland Cascade Pole & Lumber Co.	1640 E Marc Avenue	0.220	HSL, CSCSL, ALLSITES, SEMS, CORRACTS, TRIS, MANIFEST, RCRA-LQG, ENG CONTROLS, INST CONTROLS, 2020 COR ACTION	Cleanup complete for base/neutral/acid organics, metals, metals, non-halogenated solvents, phenolic compounds, and PAHs. Active monitoring occurring.
AG158	AG	10	Sound Mill Inc.	2021 Marc Avenue	0.281	HSL, CSCSL, ALLSITES, FINDS, NPDES, ECHO, FINDS, NPDES, ECHO	Arsenic, petroleum, and PAHs confirmed above cleanup levels in groundwater and soil. Cleanup started.
AG140	AG	11	Palco Steel & Salvage Inc.	1620 Lincoln Avenue	0.266	CSCSL, LUST, ALLSITES, UST	Petroleum above cleanup levels in groundwater and soil. Awaiting cleanup. Decision not to purchase due to environmental conditions. Phase I and II ESA completed. Petroleum impacted soil and groundwater.
AH153, AH154, AH155	AH	12	Northwest Wire, Rope & Equipment	2301 Lincoln Avenue	0.342	VCP, ALLSITES, CSCSL NFA, ICR	NFA since 2002 Phase I and 2 ESA completed. Soil vapor and groundwater impacted by solvents. Could not reach agreement with seller. Petroleum in soil and groundwater. Cleanup report submitted in 1996.
AB120, AB121	AB	13	Stevedoring Services	1980 Milwaukee Way	0.201	RCRA-VSQG, FINDS, ECHO	NFA and unlikley to affect Site.
B9	B	14	Tacoma Port Pump & Treat System	110 Milwaukee Avenue Parcel 41	0.005	16	Hazardous waste generator: oil sludge, sodium hydroxide, hydrochloric acid, and phosphoric acid.
B5, B7, B10 B11, B12, B14	B	15	Union Pacific Railroad Tacoma	1119 Milwaukee Way	0.007	CSCSL, LUST, ALLSITES, UST, WA INST CONTROL	Asbestos, metals, petroleum, and PAHs above cleanup levels in groundwater. Metals, petroleum, and PAHs above cleanup levels in soil. LUST monitored by Ecology in 1990.
BD254	BD	16	Occidental Chemical Corp	605 Alexander Ave	0.873	CSCSL	Contaminant: Corrosive Wastes; cleanup start Groundwater: Above Cleanup Levels Soil: Above Cleanup Levels
G29	G	17	Sound Mattress & Felt Co (former)	1940 E 11th Street	0.005	VCP, WA SPILLS	Halogenated organics confirmed above cleanup levels in groundwater. Cleanup started.
I35	I	18	Northwestern Transport Spec In	1905 E Lincoln Avenue	0.067	ALLSITES	Historical waste generator
I38	I	19	Pacific Rail Services	1918 Lincoln Avenue	0.071	ALLSITES, CSCSL NFA	Historical waste generator
I34	I	20	Lincoln Avenue Ditch	1837 Lincoln Ave	0.051	ALLSITES,CSCSL	Contaminant name: petroleum products Ground water: confirmed above cleanup levels Soil: confirmed above cleanup levels
I33	I		Tacoma Cy of Lincoln Avenue Ldfl (Closed)	1837 Lincoln Avenue	0.057	SEMS-ARCHIVE, CSCSL, ALLSITES	Metals and petroleum confirmed above cleanup level in soil and groundwater. Awaiting cleanup.
J	J	21	APM Terminals Pacific Ltd	1675 Lincoln Avenue	0.204	HSL, CSCSL, ALLSITES	Petroleum products above cleanup levels in groundwater and soil. Awaiting cleanup.

ASTM E1527 – 13

User Questionnaire

Introduction

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *"Brownfields Amendments"),* the *user* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The *user* should provide the following information to the *environmental professional*. Failure to conduct these inquiries could result in a determination that "*all appropriate inquiries*" is not complete.

1. **Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).**
   Did a search of *recorded land title records* (or judicial records where appropriate[1]) identify any environmental liens filed or recorded against the *property* under federal, tribal, state or local law?

   To the best of my knowledge, no such search has been performed.
   I am not aware of any liens or use limitations.

2. **Activity and use limitations that are in place on the *property* or that have been filed or recorded against the *property* (40 CFR 312.26(a)(1)(v) and vi)).**
   Did a search of *recorded land title records* (or judicial records where appropriate[1]) identify any AULs, such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the *property* and/or have been filed or recorded against the *property* under federal, tribal, state or local law?

   To the best of my knowledge, no such search has been performed.

3. **Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).**
   Do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an *adjoining property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?

   Only from the perspective of having it appraised for a potential purchase from Tacoma Public Utilities.

4. **Relationship of the purchase price to the fair market value of the *property* if it were not contaminated (40 CFR 312.29).**
   Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property*?

   We have yet to conclude a purchase price for the property with TPU. Two appraisers produced appraisals which we are currently reviewing. A final purchase price will reflect the fair market value of the property.

5. **Commonly known or *reasonably ascertainable* information about the property (40 CFR 312.30).**
   Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example, as *user,*

   Per the August 2016 Phase 1 I am aware that part of the southern end of the property covers an old City of Tacoma garbage dump. More recently, I learned that a UST has been located on the property.

6. **The degree of obviousness of the presence or likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).**
   Based on your knowledge and experience related to the *property* are there any obvious indicators that point to the presence or likely presence of releases at the *property*?

[1] In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental liens and AULs be filed in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs.

The old garbage dump and the UST could have produced contamination on the property.

7. What is the reason for performing/revising this Phase I ESA?

Port of Tacoma is trying to purchase the property from Tacoma Public Utilities. If we are able to successfully conclude a Purchase and Sales Agreement, we need a current Environmental Site Assessment to inform the Purchase and Sales Agreement and the Port of Tacoma Commission.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 07/19/2019 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 07/19/2019 has revealed that there are 7 SEMS sites within approximately 0.5 miles of the target property.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 07/19/2019 has revealed that there are 3 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/25/2019 has revealed that there are 7 CORRACTS sites within approximately 1 mile of the target property.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 03/25/2019 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/25/2019 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/25/2019 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 03/25/2019 has revealed that there are 4 RCRA-VSQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

WA CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

A review of the WA CSCSL list, as provided by EDR, and dated 07/16/2019 has revealed that there are

EXECUTIVE SUMMARY

66 WA CSCSL sites within approximately 1 mile of the target property.

State and tribal registered storage tank lists

WA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Ecology's Statewide UST Site/Tank Report.

A review of the WA UST list, as provided by EDR, and dated 08/12/2019 has revealed that there are 20 WA UST sites within approximately 0.25 miles of the target property.

WA CSCSL NFA: The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

A review of the WA CSCSL NFA list, as provided by EDR, and dated 07/16/2019 has revealed that there are 24 WA CSCSL NFA sites within approximately 0.5 miles of the target property.

Records of Emergency Release Reports

WA SPILLS: Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

A review of the WA SPILLS list, as provided by EDR, and dated 06/12/2019 has revealed that there is 1 WA SPILLS site within approximately 0.001 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/25/2019 has revealed that there are 35 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

2020 COR ACTION: The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

A review of the 2020 COR ACTION list, as provided by EDR, and dated 09/30/2017 has revealed that there is 1 2020 COR ACTION site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 6 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

WA RGA HWS: The EDR Recovered Government Archive State Hazardous Waste database provides a list of SHWS incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Department of Ecology in Washington.

A review of the WA RGA HWS list, as provided by EDR, has revealed that there are 2 WA RGA HWS sites within approximately 0.001 miles of the target property.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Hazardous Waste Summary:

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2,

PORT OF TACOMA (Continued) **1016977424**

TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Violation Status: No violations found

Hazardous Waste Summary:

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: U002
. Waste name: 2-PROPANONE (I) (OR) ACETONE (I)

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the

WA317942407 - PUGLIA SHIPBUILDING INC (Continued) **1001234030**

discharge does not adversely affect water quality.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

ELECTRIC MOTOR SERVICE & CONTROLS LLC (Continued) **1011924737**

events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

FINDS:

Registry ID: 110009510190

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

TSCA SUBMITTER

AIR EMISSIONS CLASSIFICATION UNKNOWN

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting

KIK TACOMA (Continued) **1000225616**

requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

OSHA ESTABLISHMENT

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

SSTS (Section Seven Tracking System) evolved from the FIFRA and TSCA Enforcement System (FATES). SSTS tracks the registration of all pesticide-producing establishments and tracks annually the types and amounts of pesticides, active ingredients, and related devices that are produced, sold, or distributed each year.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

US EPA Risk Management Plan (RMP) database stores the risk management plans reported by companies that handle, manufacture, use, or store certain flammable or toxic substances, as required under section 112(r) of the Clean Air Act (CAA).

Waste Stream Comments:
CORB Waste Sequence Number: 147376
Comments: The site is closing. This was the clean out of the caustic tank material that could not be used up prior to ceasing production.
Waste Sequence Number: 3301081
Sequence Number: 1

Comments: The site has ceased operations. The batch tank contents were drained and disposed of b/c the could not be used up prior to disposal. The material in the tank was primarily Sodium hydroxide. There was likely a mix of sodium hypochlorite within the tank based on it's usage. This is reported as Sodium hydroxide as it is the primary material
Waste Sequence Number: 3301277
Sequence Number: 1

Comments: Disposal of waste chemicals from production ceasing. Mt Hood treatment chemicals
Waste Sequence Number: 3301280
Sequence Number: 1

Comments: Contaminated cardboard. Clean up from operations ceasing.
Waste Sequence Number: 3301281
Sequence Number: 1

Comments: Left over cooling tower chemicals. Facility ceased operations. This waste is left over.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D018
. Waste name: BENZENE

. Waste code: D039
. Waste name: TETRACHLOROETHYLENE

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS

SPECTRA LABORATORIES INC (Continued) **1004793968**

LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F008
. Waste name: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 6630.6

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 11653.4

Waste code: D004
Waste name: ARSENIC
Amount (Lbs): 250

Waste code: D005
Waste name: BARIUM
Amount (Lbs): 250

Waste code: D006
Waste name: CADMIUM
Amount (Lbs): 250

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 537.7

Waste code: D009
Waste name: MERCURY
Amount (Lbs): 302.7

Waste code: D011
Waste name: SILVER
Amount (Lbs): 287.7

Waste code: D018

SPECTRA LABORATORIES INC (Continued) **1004793968**

Waste name: BENZENE
Amount (Lbs): 4227

Waste code: D039
Waste name: TETRACHLOROETHYLENE
Amount (Lbs): 4227

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 4227

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 4477

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 4227

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Kilogram Quanity: 802.872013
Recycled Percentage: 0
Waste Management System Code: H040

Waste Sequence Number: 3400708
Sequence Number: 895884
Received EPAID: WAD991281767
Managed Quanity: 287.730000
Kilogram Quanity: 130.514330
Recycled Percentage: 10
Waste Management System Code: H010

Waste Stream Comments:
CORB Waste Sequence Number: 152479
Comments: A-8. Corrosive Liquid, acidic inorganic, N.O.S. Lab analytical waste from COD testing.
Waste Sequence Number: 3400708
Sequence Number: 1

Comments: A-7. Lab pack of archived organic extract samples that contain solvents such as hexane and dichloromethane.
Waste Sequence Number: 3400909
Sequence Number: 1

Comments: A-7. Labpack consisted of old broken thermometers accumulated over years, contaminated glassware and pipets.
Waste Sequence Number: 3400928
Sequence Number: 1

Comments: A-8. Lab pack containing organic extracts for PCB testing. Vials contain hexane and sulfuric acid.
Waste Sequence Number: 3400933
Sequence Number: 1

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Registry ID: 110037545920

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

FINDS:

Registry ID: 110005342879

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

FINDS:

Registry ID: 110005313534

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

PABCO ROOFING PRODUCTS (Continued) **1000399516**

corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Registry ID: 110005387492

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

AIR LIQUIDE AMERICA SITE (Continued) **1000425132**

and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS AIR POLLUTANT MAJOR

HAZARDOUS WASTE BIENNIAL REPORTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

US EPA Risk Management Plan (RMP) database stores the risk management plans reported by companies that handle, manufacture, use, or store certain flammable or toxic substances, as required under section 112(r) of the Clean Air Act (CAA).

F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Violation Status: No violations found

Evaluation Action Summary:
Evaluation date: 01/31/1994
Evaluation: COMPLIANCE EVALUATION INSPECTION ON-SITE
Area of violation: Not reported
Date achieved compliance: Not reported
Evaluation lead agency: State

FINDS:

Registry ID: 110005386910

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D003
. Waste name: REACTIVE WASTE

. Waste code: D004
. Waste name: ARSENIC

. Waste code: D005
. Waste name: BARIUM

. Waste code: D006
. Waste name: CADMIUM

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D008
. Waste name: LEAD

SSA TERMINALS TACOMA LLC (Continued) **1015751747**

. Waste code: D009
. Waste name: MERCURY

. Waste code: D010
. Waste name: SELENIUM

. Waste code: D011
. Waste name: SILVER

. Waste code: D018
. Waste name: BENZENE

. Waste code: D022
. Waste name: CHLOROFORM

. Waste code: D035
. Waste name: METHYL ETHYL KETONE

. Waste code: D039
. Waste name: TETRACHLOROETHYLENE

. Waste code: D040
. Waste name: TRICHLORETHYLENE

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: U002
. Waste name: 2-PROPANONE (I) (OR) ACETONE (I)

. Waste code: U039
. Waste name: P-CHLORO-M-CRESOL (OR) PHENOL, 4-CHLORO-3-METHYL-

. Waste code: U075
. Waste name: DICHLORODIFLUOROMETHANE (OR) METHANE, DICHLORODIFLUORO-

. Waste code: U121
. Waste name: METHANE, TRICHLOROFLUORO- (OR) TRICHLOROMONOFLUOROMETHANE

SSA TERMINALS TACOMA LLC (Continued) **1015751747**

. Waste code: U154
. Waste name: METHANOL (I) (OR) METHYL ALCOHOL (I)

. Waste code: U159
. Waste name: 2-BUTANONE (I,T) (OR) METHYL ETHYL KETONE (MEK) (I,T)

. Waste code: U196
. Waste name: PYRIDINE

. Waste code: U213
. Waste name: FURAN, TETRAHYDRO-(I) (OR) TETRAHYDROFURAN (I)

. Waste code: U220
. Waste name: BENZENE, METHYL- (OR) TOLUENE

. Waste code: U226
. Waste name: ETHANE, 1,1,1-TRICHLORO- (OR) METHYL CHLOROFORM

. Waste code: U228
. Waste name: ETHENE, TRICHLORO- (OR) TRICHLOROETHYLENE

. Waste code: U239
. Waste name: BENZENE, DIMETHYL- (I,T) (OR) XYLENE (I)

Facility Has Received Notices of Violations:
Regulation violated: Not reported
Area of violation: Universal Waste - Small Quantity Handlers
Date violation determined: 09/25/2012
Date achieved compliance: 12/10/2012
Violation lead agency: State
Enforcement action: WRITTEN INFORMAL
Enforcement action date: 10/24/2012
Enf. disposition status: Not reported

FINDS:

Registry ID: 110000897414

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when

APM TERMINALS PACIFIC (Continued) **1000334221**

complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Form Comm:	All dangerous wastes disposed from the APM Terminals (APMT) Tacoma terminal were generated by Matson (formerly known as Horizon Lines) under an agreement with Washington State Department of Ecology (Ecology) as a reporting requirement for the Dangerous Waste Annual Report using APMT's RCRA Site ID: WAD144258779. As of September 30, 2017, APM Terminals (APMT) Tacoma, LLC ceased operations at the Port of Tacoma in Tacoma, WA. AMPT transferred its operations to SSA Marine (SSA) beginning on October 1, 2017. SSA will re-activate the RCRA WAD144258779 Site ID at the 1675 Lincoln Ave, Tacoma, WA 98421-2902 for dangerous or extremely dangerous wastes disposed from the terminal, if any, between October 1st to December 31st, 2017.

Waste Stream Comments:
CORB Waste Sequence Number: 158782
Comments: Fuel oil treatment is obtained by treating the fuel oil constantly with a material that will prevent and retard sludge formation, disperse solids, and eliminate the water. In your storage tank you have two materials to combat; water and particles of solid chemical compounds, commonly called sludge.

Form Comm:	This report covers the period Oct 01 through Dec 31 2017. SSA Terminals began operations at this facility on 01 October 2017. All dangerous wastes disposed of from SSAT Terminals (Tacoma) where generated by Matson shipping lines. Under an agreement with Washington State Department of Ecology the reporting requirement for the Dangerous Waste Annual report is met using WAD 144258779 which was re-activated by SSA Terminals (Tacoma) as of 12/15/17.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Hazardous Waste Summary:

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D004
. Waste name: ARSENIC

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D018
. Waste name: BENZENE

. Waste code: D038
. Waste name: PYRIDINE

. Waste code: D039
. Waste name: TETRACHLOROETHYLENE

. Waste code: D040
. Waste name: TRICHLORETHYLENE

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F032
. Waste name: WASTEWATERS, PROCESS RESIDUALS, PRESERVATIVE DRIPPAGE, AND SPENT FORMULATIONS FROM WOOD PRESERVING PROCESSES GENERATED AT PLANTS THAT CURRENTLY USE, OR HAVE PREVIOUSLY USED, CHLOROPHENOLIC FORMULATIONS [EXCEPT POTENTIALLY CROSS-CONTAMINATED WASTES THAT HAVE HAD THE F032 WASTE CODE DELETED IN ACCORDANCE WITH SECTION 261.35 (I.E., THE NEWLY PROMULGATED EQUIPMENT CLEANING OR REPLACEMENT STANDARDS), AND WHERE

MCFARLAND CASCADE POLE & LUMBER CO (Continued) **1015732093**

THE GENERATOR DOES NOT RESUME OR INITIATE USE OF CHLOROPHENOLIC FORMULATIONS]. (THIS LISTING DOES NOT INCLUDE K001 BOTTOM SEDIMENT SLUDGE FROM THE TREATMENT OF WASTEWATER FROM WOOD PRESERVING PROCESSES THAT USE CREOSOTE AND/OR PENTACHLOROPHENOL.)

. Waste code: F034
. Waste name: WASTEWATERS, PROCESS RESIDUALS, PRESERVATIVE DRIPPAGE, AND SPENT FORMULATIONS FROM WOOD PRESERVING PROCESSES GENERATED AT PLANTS THAT USE CREOSOTE FORMULATIONS. THIS LISTING DOES NOT INCLUDE K001 BOTTOM SEDIMENT SLUDGE FROM THE TREATMENT OF WASTEWATER FROM WOOD PRESERVING PROCESSES THAT USE CREOSOTE AND/OR PENTACHLOROPHENOL.

. Waste code: F035
. Waste name: WASTEWATERS, PROCESS RESIDUALS, PRESERVATIVE DRIPPAGE, AND SPENT FORMULATIONS FROM WOOD PRESERVING PROCESSES GENERATED AT PLANTS THAT USE INORGANIC PRESERVATIVES CONTAINING ARSENIC OR CHROMIUM. THIS LISTING DOES NOT INCLUDE K001 BOTTOM SEDIMENT SLUDGE FROM THE TREATMENT OF WASTEWATER FROM WOOD PRESERVING PROCESSES THAT USE CREOSOTE AND/OR PENTACHLOROPHENOL.

. Waste code: K001
. Waste name: BOTTOM SEDIMENT SLUDGE FROM THE TREATMENT OF WASTEWATERS FROM WOOD PRESERVING PROCESSES THAT USE CREOSOTE AND/OR PENTACHLOROPHENOL.

. Waste code: U003
. Waste name: ACETONITRILE (I,T)

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:
Waste code: D039
Waste name: TETRACHLOROETHYLENE
Amount (Lbs): 3303.2

Waste code: F032
Waste name: WASTEWATERS, PROCESS RESIDUALS, PRESERVATIVE DRIPPAGE, AND SPENT FORMULATIONS FROM WOOD PRESERVING PROCESSES GENERATED AT PLANTS THAT CURRENTLY USE OR HAVE PREVIOUSLY USED CHLOROPHENOLIC FORMULATIONS (EXCEPT POTENTIALLY CROSS-CONTAMINATED WASTES THAT HAVE HAD THE F032 WASTE CODE DELETED IN ACCORDANCE WITH SECTION 261.35 OF THIS CHAPTER AND WHERE THE GENERATOR DOES NOT RESUME OR INITIATE USE OF CHLOROPHENOLIC FORMULATIONS). THIS LISTING DOES NOT INCLUDE K001 BOTTOM SEDIMENT SLUDGE FROM THE TREATMENT OF WASTEWATER FROM WOOD PRESERVING PROCESSES THAT USE CREOSOTE AND/OR PENTACHLOROPHENOL. (NOTE: THE LISTING OF WASTEWATERS THAT HAVE NOT COME INTO CONTACT WITH PROCESS CONTAMINANTS IS STAYED ADMINISTRATIVELY. THE LISTING FOR PLANTS THAT HAVE PREVIOUSLY USED CHLOROPHENOLIC FORMULATIONS IS ADMINISTRATIVELY STAYED WHENEVER THESE WASTES ARE COVERED BY THE F034 OR F035 LISTINGS. THESE STAYS WILL REMAIN IN EFFECT UNTIL FURTHER ADMINISTRATIVE ACTION IS TAKEN.)

Environmental Interest/Information System
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the

FRED TEBB AND SONS (Continued) **1000658730**

Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

COMPLIANCE AND EMISSIONS REPORTING

OSHA ESTABLISHMENT

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

FINDS:

Registry ID: 110005385902

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Registry ID: 110056465597

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER
